## Sparks of the children's life on the move

### NEWS FROM THE WHOLE WORLD

#### Quebec (Canada): children against petroleum

Florence (11), William (9), and Lili-Rose (7), three amongst several other children were shocked by the news from the “Caisse de dépôt et de placement du Québec” that had substantially increased its investments in Petroleum energies to reach more than a billion dollars despite all the scientific and political calls to reduce the production and consumption of fossil fuels, thus reducing the consequences of global warming of the region. Here is how our children in Quebec City have responded: "We believe that adults have forgotten children and that they should make better choices for our future. We want to send 1000 photos, drawings and messages to the “Caisse de dépôt et de placement du Québec” to ask them not to encourage petroleum companies that are very polluting. You can encourage us by sending your photos, drawings or messages to: [lesenfantscontrelepetrole@gmail.com](mailto:lesenfantscontrelepetrole@gmail.com)."

Courage to the children of Quebec!
